FAREHAM & DISTRICT MODEL RAILWAY CLUB

Watt Estate

O9 | 7mm scale on 9mm track

A fictional fifteen-inch gauge estate railway, with varied loads and a collection of scenes that can be assembled in different configurations.

About the layout

Inspired by estate railways such as Sir Arthur Heywood's Eaton Hall line, Watt Estate carries produce, materials and passengers around a country estate. Look out for milk, potatoes, fruit, coal, timber, bricks and other varied loads.

Scenes and modelling

The basic layout combines an estate works yard - with office, locomotive shed, workshop, smithy and stables - and a bridge over a stream. Optional modules include a farm, vineyard, charcoal burners' camp, woodland, halt, cottage and vegetable garden. The layout featured in Railway Modeller in October 2014.

Exhibition arrangements

The modular design allows different configurations. Please contact the club to discuss the scenes, footprint, operating space, transport and power requirements for your exhibition.

Invite this layout to your exhibition

Contact the club to discuss availability and arrangements. Please include your exhibition date, venue and the layout name.
