FAREHAM & DISTRICT MODEL RAILWAY CLUB

Kiddingme

OO gauge | DCC | Compact continuous run

A continuous-run railway built for a shop window just 22 inches deep. The reaction to the brief supplied its name: "You are kidding me!"

About the layout

The working baseboard measures 8ft 6in by 18in (approximately 2.6m by 46cm). Curves of only 8in radius are negotiated by small 0-4-0 locomotives. DCC enables multiple locomotive operation and the use of stay-alive devices; points use Seep motors and a capacitor discharge unit.

Exhibition arrangements

Displayed on trestle mounts. Requires one nearby 13A socket and less than 200W. Transport is by car. Normally two operators, or one when accompanying other club layouts. Allow 1.5 hours to assemble and dismantle. Published insurance value: GBP 5,000; please confirm this when arranging a booking.

Ownership and enquiries

Kiddingme is privately owned and affiliated to Fareham & District Model Railway Club. Contact David Bolton at d.j.bolton@sky.com, or enquire through the club.

Invite this layout to your exhibition

Contact the club to discuss availability and arrangements. Please include your exhibition date, venue and the layout name.
